

Universal Desktop Ruler Full Version

Universal Desktop Ruler (Universal On-screen Digitizer) - AVPSOFT

Universal Desktop Ruler (Universal On-screen Digitizer) Universal Desktop Ruler allows you to measure not only a straight line distance but any curved distance on the Screen. Universal Desktop Ruler allows you to measure quickly and accurately distances, areas and perimeters of figures on the screen.

Universal Desktop Ruler allows you to measure not only a straight line distance but any curved distance on the Screen. Universal Desktop Ruler allows you to measure quickly and accurately distances, areas and perimeters of figures on the screen. You can determine your own scale and get results in pixels and your units of measurement (feet, inches, meters, ...). Universal Desktop Ruler is useful for measuring distance and area on a map, finding area and perimeter in a house project for example.
